1. NATIONAL STRATEGIES FOR SDG IMPLEMENTATION

The federal Long-term Vision for Sustainable Development for 2050 that was adopted in 2013, as well as the regional strategies (Flanders, Wallonia, Brussels-Capital, German-speaking Community), are aligned with the SDGs. In addition, a first National Sustainable Development Strategy (NSDS) was approved in 2017. It focuses on the implementation of the 2030 Agenda in Belgium and aims to create the basis for a coherent approach to sustainable development policies.

1.1 NATIONAL COORDINATION MECHANISMS

Three institutions are key in the preparation, adoption, implementation and improvement of sustainable development policies: the Interdepartmental Commission for Sustainable Development (ICSD) which is in charge of the planning and monitoring part of the process, a task force within the Federal Planning Bureau which reports on the current situation and makes policy evaluations and forecasts, and the Federal Council for Sustainable Development, an advisory stakeholders’ council. Directly linked to the 2030 Agenda, the Inter-Ministerial Conference for Sustainable Development (IMCSD), composed of federal, regional and community ministers responsible for sustainable development and development cooperation, is the central coordination mechanism for dialogue between the various federal and federated authorities implementing the SDGs in Belgium.

► In Wallonia, an independent sustainable development advisory unit was set up in 2013 within the Walloon administration.³

► In Flanders, a cross-cutting working group on sustainable development is guiding the translation of the SDGs into goals relevant for Flemish policy and to further their implementation.

► In the Brussels-Capital Region, it is the Minister for Environment and Energy who, historically, and in the absence of a regional coordinating body for sustainable development, follows the implementation of the 2030 Agenda.

► For the German-speaking Community, the Minister-President is responsible for the sustainability theme.

1.2 VNR ELABORATION PROCESS

In order to prepare the 2017 VNR, a political steering committee was set up which was chaired by the Prime Minister and received support from representatives of the various federal and federated entities directly involved in the implementation of the 2030 Agenda. The Inter-Ministerial Conference for Sustainable Development had the responsibility of collecting data relating to the implementation within Belgium, while the federal Foreign Ministry collected data regarding external action. The Inter-Federal Statistical Institute collected statistical data. Civil society involvement was ensured at different stages of the reporting process.

Unless otherwise indicated, all the information in this profile is taken from the previously published Voluntary National Review (VNR).²

1.3 MONITORING

The Inter-Federal Statistical Institute is responsible for the systematic monitoring of the progress made in achieving the SDGs, and has set up a specific working group to that end.

2. LRGs INVOLVEMENT IN SDG LOCALIZATION

The local government association VVSG was asked by the regional Flemish government to deliver written inputs for the VNR 2017, on the local integration of the SDGs. However, this information is not clearly reflected in the report. Over the previous years, localizing the SDGs really picked up in Flanders, resulting in growing attention for local governments by the regional and federal governments. For example, VVSG was recognized in 2018 as ‘SDG voice’, an initiative of the federal government. The city of Ghent was ‘SDG voice’ in 2017 and the city of Harelbeke in 2020. More fundamentally, there are structural consultation mechanisms between VVSG and the Flemish government on the SDGs. VVSG is indeed represented in the Flemish Council for Sustainable Development as well as involved on an ad hoc basis.

One in five Flemish municipalities has already signed up to the Global Goals, Local Focus Declaration, thereby acknowledging the importance of the SDGs and the need to develop local actions in support thereof. Pilot projects have been launched in 20 municipalities aiming to fully integrate the SDGs in overall policy and long-term plans by the end of 2018. Regions also are represented in the Federal Council for Sustainable Development.

2.1 LRGs PARTICIPATION

► In the VNR process

Comments: VVSG mentioned a puntual participation (GTF Survey 2021).

This assessment is based on the information collected in the VNR and in the Global Taskforce of Local and Regional Governments’ annual survey on the localization of the SDGs.

2.2 VNR REFERENCES

The 2017 VNR mentions the contribution of local governments, and contains some examples.

2.3 SPECIFIC PROJECTS AND CASES

► The poverty reduction strategy of the Walloon region includes a series of measures aimed at the provision of access to housing as well as improvements in terms of housing quality and energy efficiency. Also, by way of promoting sustainable mobility for all citizens, the Walloon government set up a plan which encompasses a whole series of actions aimed at improving the conditions of cycling and significantly increasing its use in the region by 2020. Among the many initiatives already launched are funding to ten pilot municipalities, awareness-raising with workers and improvements to the cycling infrastructure. Municipalities themselves are equally drafting all-encompassing mobility plans, focusing on soft mobility and incorporating measures benefiting vulnerable road users such as pedestrians and cyclists.

► The Flemish instrument for urban renewal (an annual call for projects) supports cities in developing urban projects with particular attention to environmental sustainability and/or climate neutrality, mobility, spatial quality and core compaction, family and child-friendliness, green-blue features, as well as balance between private and public spaces. Projects such as the reconversion of a disaffected railway site in Leuven into housing units, social services and public spaces combine ecological concerns with social viability and are linked to community development and cooperation initiatives between public, private and civil society actors.

5. A paragraph mentions them as follows: “As front-line authorities rooted in local practice, they embody a bottom-up approach in the search for solutions to global problems, and they endeavor to offer adequate public services accessible to all citizens. In this effort, they are supported by specialized associations such as the Union des Villes et Communes de Wallonie, Bru-localis and the Vereniging voor Vlaamse Steden en Gemeenten” (see VNR, 2017, p. 6).
2.4 VOLUNTARY SUBNATIONAL AND/OR LOCAL REVIEWS (VSRs / VLRs)

The city of Ghent produced two VLRs, in 2020 and 2021, with follow-up reports planned in the coming years.¹¹ The region of Wallonia also published VLRs in 2017 and 2019.¹²

2.5 MEANS OF IMPLEMENTATION

Since 2017, VVSG receives funding from both the federal and the Flemish government to support municipalities in localizing the SDGs.

3. RELEVANT INFORMATION

**General comments:** Belgium appointed a national focal point for the implementation of the Sendai Framework in 2016. The subsequently established Belgian Sendai implementation platform draws on expertise of all interested Belgian authorities to assess existing initiatives, crisis-response structures, coordination protocols and civil protection responsibilities. Making the paradigm shift from crisis response to risk management should pave the way to a national disaster risk reduction security strategy.

3.1 WOMEN PARTICIPATION

No reference.

3.2 COVID 19

**VVSG** has been part of multiple national working groups / task forces related to COVID-19 measures, for example on care, local economy, vulnerable groups, vaccinations, youth, childcare, etc. The association is currently trying to involve local governments in national decisions regarding European recovery funds. It also provides information to members through a dedicated webpage and webinars.¹³

4. SDG INDICATORS¹⁴
